

Gabriel J.E. Rinkel, MD, FRCP (Edin)

Professor and Chair of Neurology, Department of Neurology and Neurosurgery, University Medical Center, Utrecht

Gabriel Rinkel is professor and chair of Neurology and director Research and Education of the Division of Neuroscience at the University Medical Center Utrecht. In 1991 he finished his training in neurology and defended his PhD thesis on perimesencephalic subarachnoid haemorrhage. His research is focussed on subarachnoid haemorrhage and intracranial aneurysms, on which he has published more than 400 papers in international peer reviewed journals, has given lectures at more than 30 universities in 4 continents. He is a regular invited speaker at many international conferences and has long lasting international collaborations with the University of Edinburgh and the University of Toronto.
